Plum Creek Awards \$2,000 to Boys & Girls Club of Langlade County

TOMAHAWK, Wis. – The Plum Creek Foundation today announced that it has awarded the Boys & Girls Club of Langlade County a \$2,000 grant. The grant will be used to assist the organization with its “Smart Girls” program, which is an education program designed to increase self-esteem in girls between the ages 8 and 17.

Scott Henker, senior resource manager for Plum Creek in Wisconsin, will present a check to the Boys & Girls Club at 11:00 a.m., on Monday, Sept. 25, at the Boys & Girls Club in Antigo, 801 5th Ave.

Through the “Smart Girls” program, young women in Langlade County build skills for life, while developing positive relationships with peers and adults. From dynamic sessions and activities, to field trips and mentoring opportunities with adult women, girls have the chance to take part in fun activities that help foster their growth and maturity.

“We are pleased that Plum Creek has recognized our efforts and is supporting our goal of meeting the needs of our community’s young women,” said Kim McCann, chief professional officer for the Boys & Girls Club of Langlade County. “Providing opportunities for youth in Langlade County is a top priority for our organization. We are pleased that this grant will further allow us to serve our community.”

The mission of the Plum Creek Foundation is to provide philanthropic contributions to support and improve the general welfare of life in the communities that Plum Creek serves. The Foundation board meets quarterly to review applications submitted from organizations in the company’s operating communities. Visit the Community Involvement page on Plum Creek’s Web site at www.plumcreek.com to download an application.

###

Plum Creek is the largest and most geographically diverse private landowner in the nation with more than 8 million acres of timberlands in major timber producing regions of the United States and 10 wood products manufacturing facilities in the Northwest. Plum Creek owns and manages more than 500,000 acres of timberland in Wisconsin and participates in a number of land conservation initiatives in the United States.
