### **Plum Creek Awards \$5,000 to Greenville Adult and Community Education**

**GREENVILLE, Maine** – The Plum Creek Foundation recently awarded a \$5,000 grant to the Greenville Adult and Community Education program “Enriching our Communities through Education,” which will be used to help fund basic-skill courses and vocational-technical programs for area adults.

The Greenville Adult and Community Education program provides the community with adult basic education classes, English language acquisition programs and vocational education programs. The programs teach adults in the Moosehead Lake Region the skills they need to be productive workers, supportive family members and contributing community citizens. In addition, Greenville Adult and Community Education has addressed the area’s literacy issues with L.I.F.E for Little Ones, helping the area school system address some of its pre-school needs.

“We are grateful for this generous Plum Creek Foundation grant,” said Dr. Steven Pound, PhD, director of Greenville Adult and Community Education. “These programs will help enrich the community in which we live, work and play, and we look forward to continuing to help our community members grow.”

The mission of the Plum Creek Foundation is to provide philanthropic contributions to support and improve the general welfare of life in the communities that Plum Creek serves. The Foundation board meets quarterly to review applications submitted from organizations in the company’s operating communities. Visit the Community Involvement page on Plum Creek’s Web site at [www.plumcreek.com](http://www.plumcreek.com) to download an application.

###

Plum Creek is the largest and most geographically diverse private landowner in the nation, with 8.2 million acres of timberlands in major timber producing regions of the United States and 10 wood products manufacturing facilities in the Northwest.
