PLUM CREEK'S WILSON PROMOTED TO GENERAL MANAGER OF NEWLY CREATED LAKE STATES REGION

Wilson will oversee land management operations in Wisconsin and Michigan

TOMAHAWK, Wis. — Plum Creek Timber Company (NYSE: PCL) today announced that Lynn Wilson has been promoted to general manager of the Lake States Region. Previously, Wilson served as Plum Creek's Wisconsin senior resource manager.

Wilson has 20 years of forestry and management experience. She joined Plum Creek in 1998 and in her eight years with the company, she has served as a company logging superintendent, log merchandising superintendent, resource manager, senior resource manager and now general manager.

“Lynn is truly an asset to Plum Creek, and we are pleased to have her on board as general manager,” said Plum Creek Executive Vice President Leonard Kosar. “She has been the driving force for our efforts in Wisconsin, while championing team-building and leadership development. We are confident that she will continue to help Plum Creek succeed as the general manager of our newly created Lake States Region.”

The Lake States region was created because Michigan and Wisconsin have common markets, shared customer base and other similarities, and the company saw an opportunity to coordinate operations in these two states. Wilson's office will remain in Tomahawk, and her duties as general manager will include overseeing operations of Plum Creek's Wisconsin and Michigan land, which totals more than 1 million acres.

Wilson graduated from the University of Maine with a degree in forest management, and she also graduated cum laude with a Master of Business Administration from Thomas College. Wilson is on the board of directors for Lake States Lumber Association (LSLA), and is also a member of the Wisconsin Department of Natural Resources' (DNR) Forestry Best Management Practices Advisory Committee, as a representative of the LSLA. She is also a member of the Society of American Foresters, the Forest Resource Association – Lake States Technical Division Policy Committee and the Wisconsin Paper Council Forest Practices Committee.

-more-

Plum Creek is the largest and most geographically diverse private landowner in the nation with more than 8 million acres of timberlands in major timber producing regions of the United States and 10 wood products manufacturing facilities in the Northwest. The company owns and manages more than 500,000 acres of timberland in Wisconsin and more than 640,000 acres in Michigan. More information about the company can be found at www.plumcreek.com.
